## THE HEAVY FABRICATION SPECIALIST

KEWAUNEE FABRICATIONS  
TRUST NOTHING LESS.

# TRUST NOTHING LESS.

▼ Kewaunee's skilled, certified welders bring exacting precision and enduring quality to every weldment.

## AN EARNED REPUTATION FOR EFFICIENT DELIVERY

No one can afford to compromise their integrity. That's why respected industry leaders like Caterpillar, Manitowoc Cranes, Pierce Manufacturing and Marine Travelift continue to trust their heavy fabrications to Kewaunee.

A proactive orientation and a high level of responsiveness have earned Kewaunee a longstanding reputation for reliability and efficiency. We deliver exactly what we promise. And the performance of our weldments meets or exceeds each customer's expectations.

Because of the cost savings, capacity and lead time advantages we offer, many Kewaunee customers equipped to fabricate their own heavy weldments still choose Kewaunee as their best option.

## VALUE-ADDED ENGINEERING

In materials specification, product development and process engineering, Kewaunee's design engineering support—as well as our mechanical engineering staff—offer valuable perspectives. Our guidance is focused on increasing manufacturing efficiencies that reduce your costs and turnaround time.

We welcome the opportunity to get involved in your development process as early as possible.

▲ Kewaunee is equipped to form metal up to 3 inches thick with exacting precision.

## TURNKEY ADVANTAGES FROM START TO FINISH

Kewaunee Fabrications is the top-quality heavy fabrication specialist. Since 1941, we've offered turnkey advantages by providing all aspects of heavy fabrication—manufacturing engineering, cutting, forming, welding, machining, blasting, painting and assembly—under one roof.

It's what we do.

Kewaunee's seamless project management eliminates non-value activity to maximize your time and cost savings. From start to finish, we offer the single-source advantages of greater control and efficiency, improved accuracy and complete accountability.

## FIELD-PROVEN QUALITY

Kewaunee's quality touches the lives of millions of people every day. More than 200 heavy fabrication specialists bring unrivaled expertise—and an average industry tenure of more than 20 years—to our technology, equipment and materials.

Our quality-focused culture takes your performance criteria as seriously as you do. That's why, from mill to finished part, Kewaunee offers comprehensive documentation for complete material traceability.

▼ Kewaunee is a true heavy fabrication specialist, producing heavy weldments like this on a daily basis.

## CORPORATE STRENGTH

As a subsidiary of Oshkosh Truck Corporation, Kewaunee Fabrications offers additional advantages—including the leveraged buying power of over 1 million pounds of steel per day and over 80 years of custom engineering competence. Ongoing investments in employee training programs, new technologies and ever-expanding capabilities demonstrate our continuing commitment to the industry—ensuring Kewaunee's leading position as heavy fabrication specialists.

▲ Experienced Kewaunee technicians maximize the productivity of specialized heavy fabrication technologies such as this horizontal boring mill.

▲ Kewaunee Fabrications inspects each piece to demanding quality standards. On-site third-party inspection is also available.
